LISTING OF HOMES FOR SPECIAL CARE

This report provides a comprehensive list of "homes for special care" as defined under the Canada Assistance Plan. These are residential welfare institutions which have been listed in Schedule "A" to the federal-provincial agreements for federal sharing in 50% of eligible costs incurred by the provinces on behalf of needy residents therein. Hospitals, correctional institutions or institutions whose primary purpose is education are excluded, as the definition of homes for special care excludes such facilities. However, that part of a hospital which is used as a residential welfare institution is included in the definition.

Requests for the listings of institutions as homes for special care are received from the provinces at their discretion.

The distribution of beds by level of care is not available for some homes. In these cases the distribution has been estimated by a standard procedure: the total number of beds is evenly divided between all applicable levels of care. If the total cannot be evenly divided, the remainder is divided and added to as many columns as necessary, starting from the left-most one. Where this distribution has been estimated, an asterisk (*) follows the total number of beds for an individual home for special care.
